

SERVICE OFFERINGS

MPS is an SBA-Certified HUBZone Small Business serving Government and Nonprofit organizations

Organizational Development

Each organization's assets, resources, culture, and business model are unique. MPS will help you develop the strategy, workflows, assessments and interventions you need to keep delivering on your mission with optimum effectiveness.

Enterprise IT Support

Complex technologies require close monitoring and constant upgrades. From design and compliance, roadmaps and architecture, to reporting and engaging stakeholders, MPS consultants deploy people-centric processes and controls to plan for and manage cost-effective, maximum efficiency IT.

Software Development Support

For software development, you need a project approach. Using Waterfall, Agile, or hybrid, shaped by the PMBOK® or the Agile Manifesto, our project-level support services will deliver the desired outcome – on time, within budget, and with a maximum buy-in from all stakeholders.

Cyber Security Management

“Protecting everything protects nothing,” especially given today's highly distributed and collaborative work style. MPS' cyber security team has experience addressing actual and potential threats in multiple types of IT architecture, and the program management acumen to empower your team to manage the controls and audits.

Cloud Transition & Implementation

Cloud computing has a significant return on investment by eliminating the need to maintain hardware and software infrastructure. MPS can help you choose the right solution to phase out your legacy infrastructure and move to a cloud environment.
